Radio streaming on Android Automotive OS

Designed specifically for vehicles, the Android Automotive OS audio streaming applications offer drivers and passengers a convenient and immersive way to enjoy audio content while on the road. Tailored for use with Android Automotive OS, Kineton develops applications that seamlessly integrate with the vehicle's infotainment system to provide a safe and intuitive user experience.

The Android Automotive OS audio streaming app is designed for in-car use, offering easy access to music, podcasts, and radio stations. Its user-friendly interface ensures safe navigation while driving, with intuitive controls and large menus. Supported streaming services provide a wide range of content options and overall it's a comprehensive solution for enjoying audio content on the road with Android Automotive OS.
